## NextGen Healthcare's Inpatient Clinicals Receives 2014 ONC HIT Certification

*Solution compliant with the ONC 2014 Edition criteria and certified as a Complete EHR*

HORSHAM, Pa.--(BUSINESS WIRE)-- [NextGen Healthcare Information Systems, LLC.](#), a wholly owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and a leading provider of healthcare information systems and connectivity solutions, announced today that [NextGen® Inpatient Clinicals](#) version 2.6 is compliant with the ONC 2014 Edition criteria and was certified as a Complete Electronic Health Record (Complete EHR) on September 18, 2013 by the Certification Commission for Health Information Technology (CCHIT®), an ONC Authorized Certification Body (ONC-ACB). The certification was in accordance with the applicable Hospital certification criteria adopted by the Secretary of Health and Human Services. The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The ONC HIT Certification Program certifies that Complete EHRs meet all of the 2014 Edition criteria and EHR Modules meet one or more — but not all — of the criteria approved by the Secretary of Health and Human Services (HHS) for hospital technology. ONC HIT certification updates will be available at <http://www.cchit.org> as they occur.

"We believe achieving 2014 Complete EHR certification for NextGen Inpatient Clinicals is another essential benchmark for clinical professionals to consider as they evaluate software," said Jonathan Isaacs, Sr. Vice President, Hospital Solutions Division Manager. "It is also demonstrative of our commitment to provide hospitals with high-quality tools that help improve care quality and operational efficiencies. Meaningful Use Stage 2 is a critical aspect of this certification and in healthcare reform, which serves as a key driver of those goals. With this certification, we continue to be at the forefront of HCIT by providing our clients with solutions that help ensure their success amid the changing healthcare landscape."

"CCHIT congratulates companies successfully achieving EHR technology certification," said Alisa Ray, executive director, CCHIT. "These companies are now able to make their products available to providers wishing to adopt health IT to demonstrate meaningful use and earn federal incentives."

The certification number for NextGen Inpatient Clinicals version 2.6 is CC-2014-345777-8. ONC HIT certification conferred by CCHIT does not represent an endorsement of the certified EHR technology by the U.S. Department of Health and Human Services.

The clinical quality measures to which NextGen Inpatient Clinicals version 2.6 has been certified include: CMS32v2, CMS55v1, CMS71v2, CMS72v1, CMS73v1, CMS91v2, CMS102v1, CMS104v1, CMS105v1, CMS107v1, CMS108v1, CMS109v1, CMS110v1, CMS111v1, CMS114v1, and CMS190v1.

The additional software NextGen® Inpatient Clinicals relied upon to demonstrate compliance includes ExitCare, NewCrop and First Data Bank.

Additional types of costs that an eligible hospital would pay to implement NextGen Inpatient Clinicals version 2.6 in order to meet meaningful use objectives may include, but are not limited to: additional license and monthly subscription fees for NextGen® Patient Portal, First Data Bank content, monthly service fees, development interface/configuration fees, and integration fees (which will be listed as part of the 2014 Certified Product's Implementation and/or upgrade plan).

### About CCHIT

The Certification Commission for Health Information Technology (CCHIT®) is an independent, 501(c)3 nonprofit organization with the public mission of accelerating the adoption of robust, interoperable health information technology. The Commission has been certifying electronic health record technology since 2006 and is authorized by the Office of the National Coordinator for Health Information Technology (ONC) of the U.S. Department of Health and Human Services (HHS) as a certification body (ONC-ACB). CCHIT is accredited by the American National Standards Institute (ANSI) as a certification body for the ONC HIT Certification Program for electronic health record (EHR) technology and accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) of the National Institute of Standards and Technology (NIST) as an Accredited Testing Laboratory (ATL) to test EHRs. More information on CCHIT and its programs is available at <http://cchit.org>.

## About the ONC HIT Certification Program

The ONC HIT Certification Program, provided by the Certification Commission for Health Information Technology (CCHIT®) as an Office of the National Coordinator — Authorized Certification Body (ONC-ACB), evaluates EHR technology that has been tested against criteria and standards adopted by the Secretary of Health and Human Services (HHS). This certification qualifies EHRs as capable of supporting achievement of meaningful use for the Medicare and Medicaid EHR incentive programs authorized by the American Recovery and Reinvestment Act of 2009 (ARRA). ONC HIT certification conferred by the Certification Commission does not represent an endorsement of the certified EHR technology by the U.S. Department of Health and Human Services.

"CCHIT®" and "CCHIT Certified®" are registered trademarks of the Certification Commission for Health Information Technology.

*This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company's future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; uncertainties concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods' financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems' periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company's quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company's revenues and operating results are very difficult to forecast. A major portion of the Company's costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company's period-to-period financial performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.*
