

FOR IMMEDIATE RELEASE

NEXTGEN HEALTHCARE LAUNCHES NEW 8 SERIES ELECTRONIC HEALTH RECORD (EHR) CONTENT

Efficient, crisp design provides intuitive, intelligent workflow, enhances patient care and throughput

Horsham, Pa. – November 19, 2012 – [NextGen Healthcare Information Systems, LLC](#), a wholly owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and a leading provider of healthcare information systems and connectivity solutions, announced today the launch of its new [8 Series](#) Electronic Health Record (EHR) Content, its most advanced EHR, boasting enhanced usability, configurability and adoptability.

Based on more than 15 years of clinical experience and input from thousands of clinical users, this revolutionary and powerful system features automated outcomes reporting, enhanced disease management workflows, and precise content for 25+ medical specialties. With a new user interface, standardized framework for all templates and streamlined navigation, the 8 Series EHR Content is faster and easier to use, helping providers set the stage for patient-centered care by empowering them to:

- **Work safer and simpler.** The improved suite of templates and the newest User Interface standards, coupled with a 7-tabbed clinical workflow, provides improved care management and streamlined processes documenting a complete patient encounter with minimal navigation. Additionally, with embedded Meaningful Use (MU) criteria, providers have the ability to receive MU credit without leaving the optimized workflow area.
- **Work smarter.** With a logical, easy-to-manage layout, the new 8 Series EHR Content has a clinically intuitive workflow with minimal navigation and a color scheme that is restful to the eyes. The new crisp, clean design helps users quickly recognize and process information displayed on the screen with minimal visual interferences or distractions.
- **Work faster and easier.** The 8 Series EHR Content is easy-to-configure to a personalized workflow and more efficient user experience, thus enabling users to implement the framework quickly. The intuitive navigation and design reduces training and implementation time while ensuring outstanding adoption.

- **Work Connected.** Automate referrals, prescriptions, lab results, and more. Gain real-time access to up-to-the-minute patient data, streamline processes, increase practice efficiencies and expedite administrative tasks to ultimately deliver better patient care.

“NextGen Healthcare’s solutions and services are focused on the future delivery of healthcare and supporting the infrastructure that healthcare organizations need to stay ahead of the curve,” said Steven T. Plochocki, chief executive officer of Quality Systems, Inc. “With the launch of the revolutionary 8 Series EHR Content, we have provided our clients with the best possible solution to meet their medical, administrative and financial needs while preparing them for critical industry initiatives such as Meaningful Use Stage 2, ICD-10, collaborative care, and shifting reimbursement models.

This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company's future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the U.S. Food and Drug Administration; uncertainties

concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods' financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems' periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company's quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company's revenues and operating results are very difficult to forecast. A major portion of the Company's costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company's period-to-period financial performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
