Women’s Health Solutions

Improve productivity, patient outcomes, and profitability
NextGen’s shared medical record delivers some of the biggest benefits we’ve seen. It enables doctors to have a comprehensive view of patient care and to deliver consistent messages to patients.

William Maxwell, Jr., MD
OB/GYN Division Chief
Texas Health Care
The women you treat require specialized healthcare. Shouldn’t your healthcare technology partner offer solutions tailored to women’s health?

Rely on a Women’s Health-Specific Solution

Take the right step toward more efficient, collaborative care—and a better bottom line.

Improve patient care and your practice productivity—all while saving money, earning incentive payments, and staying on top of regulatory requirements. Join thousands of obstetricians and gynecologists seeing fast, meaningful results using our women’s health-specific solutions. Benefit from expert guidance and support from our team of women’s health professionals, including a dedicated Women’s Health Specialty Director.

Learn more about our one-of-a-kind commitment to women’s health. Find out how we can help your practice achieve its clinical, financial, and operational goals.
NextGen® Ambulatory EHR for Women’s Health

Improve care
Help ensure a quick, accurate diagnosis; better treatment; more efficient patient visits; and superior patient management using diagnostic-driven templates and an ACOG-like workflow.

- Efficiently exchange data with ultrasound machines and other ob-gyn devices
- Collect comprehensive data for your prenatal report throughout the patient’s pregnancy
- Organize and standardize data for labor and delivery
- Effectively and comprehensively document GYN and family planning visits

Be more productive
Work more efficiently using our 2014 Edition compliant* Ambulatory EHR, fully integrated with our Practice Management and Revenue Cycle Management solutions. By sharing one database, these tools help you intelligently manage patient data, volume, and scheduling.

- Automate labor-intensive tasks for better productivity
- Manage every facet of your practice through reporting
- Expedite office visits by quickly capturing, organizing, and sharing patient information

Save money. Get paid
You can effortlessly report on care quality while conducting outcome analysis via custom queries. From ad hoc reporting and automated data collection to sophisticated analysis, our solutions deliver.

- Stay on top of changing reimbursement models
- Get paid for meeting quality incentives
- Cut A/R days, improve collections, drive down the cost of operations, and enhance your overall revenue
“Our multi-location OB/GYN office operates seamlessly with NextGen EHR. With patient information at our fingertips, our employees are more productive. Quick e-Prescribing means happier patients. With lab and radiology interfaces, results reporting is easy. But, best of all, we greatly enhanced our revenue cycle.”

Cindy Bowen, MHSA, Administrator
Desert West OB/GYN, Ltd.
Women's Health focus and expertise

Our Women’s Health clients leverage:

- Support from dedicated Women’s Health specialty director and experts
- Pre-built ob-gyn content covering HPI, procedures, exams, histories, and more
- OB-specific data including pregnancy outcomes, parity auto-calculation, and postpartum
- GYN-specific data, including abnormal Pap tracking, LEEP, colposcopy, and IUD
- Complete family planning and reproductive healthcare content, including procedures, management plans, medication dispensing, and abortion services
- Diagnostic-driven templates for quick, accurate diagnosis, treatment, and management
- An ambulatory EHR that's interoperable with other systems
Establish a strong business model

You need a stable, proven technology partner to successfully enhance care, increase revenue, and help you adapt to the evolving healthcare landscape. That’s NextGen Healthcare.

- Proven implementation strategy and focused training philosophy
- Wide variety of support services to maximize your investment
- Manage collections and accelerate cash
- Streamline workflow and processes
- Eliminate administrative headaches and automate repetitive tasks
- Get Meaningful Use incentives – our clients have successfully attested for $1 Billion in MU incentive dollars

Get MACRA and MIPS guidance and support

If you’re concerned about how your practice will address MACRA and MIPS demands, NextGen Healthcare has you covered. We support 10 women’s health-specific reporting measures (39, 46, 48, 110, 111, 112, 134, 205, 336, and 418) and moving forward, we plan to support even more.
“With our new, standard method for entering data, my clinical workflow is faster. NextGen EHR demands a consistent approach to documentation, so our medical assistants can easily transition among different practices and doctors.”

William Maxwell, Jr., MD
OB/GYN Division Chief
Texas Health Care
More than an EHR: integrated, innovative solutions

Join over 17,000 Women's Health providers who are using our integrated solutions.

No matter how powerful your EHR is, it takes more than a single solution to help your practice run smoothly and productively. Solutions such as our parity calculator, ob-gyn synopsis, pre-built HPIs, and PQRS measures help you improve clinical and administrative results, while achieving your MU, PCMH, and ACO goals. In fact, we already have over 30% of PCMHs and about 120 ACOs as clients.

NextGen Ambulatory EHR integrates seamlessly with our entire product suite—including NextGen® Practice Management, NextGen® Patient Portal, and NextGen® Health Information Exchange—for consistent, streamlined, real-time clinical and administrative workflow.

As you evolve, our enterprise architecture supports your changing business requirements. Find out how our comprehensive suite can help you thrive.

Embrace Value-Based Care With Confidence

NextGen Healthcare solutions and services help practices transform to and succeed in value-based care and measurably improve patient outcomes and population health at lower costs.
Improve patient engagement

With NextGen Healthcare patient engagement solutions you can:

• Ensure proactive population management
• Identify high-risk patients, manage chronically ill patients, and expedite care management
• Optimize time and resources to focus on quality care
• Drive down costs

Enhance population health using interoperable solutions

With interoperable NextGen® solutions, you can:

• Securely exchange private health information, even with large hospitals
• Create a community-wide view of patients across disparate systems
• Measure and report the health of your population for value-based reimbursements
• Make the most of your existing IT resources and investments
Shouldn’t your technology partner, and its solutions, support your growth?

As the healthcare market evolves—particularly as a result of quality initiatives and the demands for community data sharing—we can help ensure that your investment is continually relevant and adjusts to your changing technology needs.

NextGen Healthcare is proudly associated with the U.S. Women’s Health Alliance. The USWHA is composed of over 2,000 providers and their 20,000+ employees, who directly care for the lives of over 10 million women.

NextGen Healthcare is also proudly associated with the Planned Parenthood Federation of America.

NextGen Healthcare covers your current and evolving needs.

*NextGen Ambulatory EHR version 5.8.2 is 2014 Edition compliant and has been certified by ICSA Labs in accordance with applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services. ONC CHPL Number: 140204R01.
