

# Online ICD-10 education from NextGen Healthcare and 3M

## Time is short, so ease your ICD-10 transition

Going from 13,600 ICD-9 codes to 69,000 ICD-10 codes takes time, preparation, and practice. That makes the transition to ICD-10 challenging for every provider. To help ease this transition, NextGen Healthcare is partnering with 3M™ Health Information Systems to offer a comprehensive ICD-10 Online Education Program. This robust, web-based training includes:

- Coder & CDI Modules
- Basic & Advanced Awareness Modules
- Physician Education Modules
- Advanced Practice Modules for the Coders and CDI Specialists

### Key benefits include:

- Easier transition to ICD-10
- Fewer errors, more accurate claims
- Faster payment
- Simple, anytime, anywhere online access
- CE credits
- Modular based, customized to the needs of the client

## Education that's dedicated to ICD-10-specific issues

The program includes 22 interactive modules (11 ICD-10-CM courses and 11 ICD-10-PCS courses) accessible online, anytime, anywhere. Each course is approximately 90 minutes in length. Modules are broken into smaller, manageable lessons to make scheduling easier. Students may take a course as often as needed and complete practice tests, learning exercises, and post-tests. Coursework includes:

- Review of ICD-10-CM coding guidelines, the ICD-10-PCS reference manual, and other ICD-10 educational materials to identify areas where increased clinical knowledge is needed
- Specialty-specific physician modules, allowing physicians to focus on the ICD-10 issues most relevant to their practice

## Earn CE credits!

CEs are assigned after each course and successful completion of the post-test. Credits are AHIMA, AAPC, ACDIS, and Georgia Nurses Association approved for Continuing Education Credit.

## Build your knowledge one component at a time

This ICD-10 Education program is divided into four distinct components, each designed to build on the learning of the previous component.

- **Component One** - Begins the preparation for your Coders and CDI Specialists with 22 specific web-based modules, designed to deliver a robust and thorough background
- **Component Two** - Offers a Basic Course designed for administrators who don't do any type of code assignment as well as an Advanced Awareness course for ancillary departments that do some sort of code assignment but don't need to know the classification system to the same level as an HIM department coder
- **Component Three** - Contains Physician Education Modules by Specialty, designed specifically to address new or changed documentation requirements in ICD-10 and what stays the same from ICD-9
- **Component Four** - Provides Advanced Practices for Coders & CDI Specialists with ICD-10 exercises and activities using actual medical records, allowing the student to practice what was learned in the 22 comprehensive modules; this component is designed to build a student's confidence in the ICD-10 Classification System

## Package Offering

### Physician Practice Package (ICD-10 EDU-ANN-PHYCL-BP)

Includes all four components:

- 22 coding modules (11 CM and 11 PCS)
- Both Basic and Advanced Awareness Courses
- Physician Education Modules by Specialty (20 videos, 1 intro + 19 specialty-specific)
- Advanced Practice Modules for Coders & CDI Specialists

### Ambulatory and Inpatient Coder Package (ICD-10 EDU-ANN-COD-BP)

Includes components one, two, and four (everything but physician videos):

- 22 coding modules (11 CM and 11 PCS)
- Basic and Advanced Awareness Courses (two courses)
- Advanced Practice Modules for Coders & CDI Specialists

### Ambulatory Coder Package (ICD-10 EDU-ANN-CM-BP)

Includes components one, two, and four (Note this only includes the 11 ICD-10 CM modules from component 1)

- 11 CM Coding modules
- Both Basic and Advanced Awareness Courses
- Advanced Practice Modules for Coders & CDI Specialists
