

COMBAT THESE 5 BARRIERS TO EDR Replacement

Replacing your current EDR doesn't have to be difficult.

And it's becoming a common trend.

About **50%** of providers are dissatisfied with their EDR.

DON'T LET THESE FIVE ROADBLOCKS HOLD YOU BACK FROM A MUCH-NEEDED
EDR UPGRADE!

1

EHR COMPATABILITY

A true integration of dental and medical data delivers a single-patient record that drives simplicity and better outcomes.

Why is a single-patient record better?

Full, reciprocal access to patient dental and medical records from a single-patient record enhances patient wellness and safety, and delivers better treatment outcomes.

2

TRAINING ... AGAIN

The hardest part is over! You made that initial leap from paper to EHR. The mystique and fear should be gone by now. Plus, you already have the practice management system up and running.

3

DATA CONVERSION WORRIES

Three key points to avoid any hiccups:

1. Keep a copy of your old system for a while.
2. Do conversion testing before you go live on the new EHR.
3. Rely on your proven EDR partner! They've done this before and can advise you along the way.

Not a barrier, but an opportunity?

Take this time to analyze and clean up your data!

4

YET ANOTHER IMPLEMENTATION

Preparation and communication are crucial. Involve everyone on your staff in the process. Learn from your EHR colleagues' experiences. And don't forget to communicate this change to your patients.

5

PRODUCTIVITY LOSS

You should ramp up faster since this is your second time around with an EDR implementation. And the NextGen[®] Electronic Dental Record (NextGen EDR) implementation is much easier than the initial NextGen[®] Ambulatory EHR implementation. Some key action items:

- Ensure staff readiness
- Extract data up to a month in advance
- Create mitigation plans
- Open up communication

By tackling these **five barriers** head on, you can get through your replacement project and get back to sleeping soundly—without EDR nightmares!

Here at NextGen Healthcare, we've already helped hundreds of practices make the switch. If you are in "EDR replacement mode," contact us today. Our experts can help you ease the process and provide a solution to meet your needs today and in the future.

Because you already have NextGen Ambulatory EHR you know it is easy to use, intelligent, integrated, and interoperable! And the way it supports individual physician and dentist workflow is very intuitive. So you can work faster, share data, and coordinate care. **Plus, NextGen EDR 5.0 is 2014 Edition compliant.***
