Caring for your pediatric patients is challenging

Your pediatric EHR shouldn’t be
The new NextGen® Ambulatory EHR 8 Series for pediatric practices has the specialty content you need and the user experience you want. 
Conquer your EHR phobia

The anxiety of some pediatric patients and parents is well documented. So is your anxiety about adopting an EHR. Last year’s study by The American Academy of Pediatrics cited your concerns about finding an EHR system that meets the unique needs of pediatric medicine.¹

NextGen Healthcare Pediatric EHR. Better care for patients, every year.

NextGen Healthcare has clinical depth in medical specialties; pediatrics is one of more than 25 medical specialties we offer in our NextGen Ambulatory EHR solution. You’ll accelerate documentation, diagnosis, and treatment using pediatric-specific EHR content:

- Weight-based dosing features, automatic growth chart plotters, and immunization tracking
- Age-specific normals, integrated immunization tools, and pediatric symptom checklists
- Pre-built HPI templates, including cough, otitis media, constipation, rash, throat, urinary problems, ADD, and ADHD
- Developmental histories and milestones based on Bright Futures™ standards
- Integrated M-CHAT® screening; ongoing care templates for developmental, social, and interval care
- Numerous pediatric procedure templates, such as foreign body removal and laceration repair
- Change pediatric order sets on the fly without learning a template building tool
- Easily pick up, use, and configure the EHR with any additional pediatric specificity you want
The New 8 Series EHR.

Your timing couldn’t be better. Our new 8 Series EHR is the most advanced software solution we’ve ever produced. It’s smart, simple, and fast.
Integrate your workflow, speed care, and succeed at a whole new level. Connect your 8 Series EHR for pediatric medicine with our entire product suite:

- Improve office productivity and enhance revenue and cash flow with NextGen® Practice Management (NextGen PM)
- Connect and communicate with your patients using NextGen® Patient Portal
- Read and auto-import data into your patient charts using our 8 Series EHR with NextGen® Health Information Exchange; connect with other exchanges, registries, hospitals, and more
- Use NextGen® Mobile 3.0 to respond and make decisions anywhere, anytime with real-time data from your 8 Series EHR and your NextGen PM data
- View critical clinical, financial, operational, and user-specified data in visually rich graphical format with NextGen® Dashboard 3.0
- Be fully compliant with Meaningful Use, HIPAA 5010, and on track to implement ICD-10
- Position your practice for success in new care models including PCMH and ACO
Get in the game.

NextGen Ambulatory EHR Series 8 is a game changer.

Call 855.510.6398 and ask for our Pediatric Care Specialty Director.
