Enterprise software solution and trusted web-based platform for large practices

The all-in-one solution for practice management and clinical charting. Scalable and flexible for growing practices that are multi-specialty, multi-location and multi-provider.

Anywhere, anytime access to your cloud solution, QSIDental Web.

QSIDental
Web®

Tap into patient data and imaging studies from anywhere you need to work – in any office suite, in the exam or consultation room, or anywhere off hours – using virtually any "smart" device.

Control security and access using security groups or narrow it all the way down to a specific user. Your practice, your option.

QSIDental Web

- Integrated clinical charting and practice management for enhanced care and ROI

- Cloud technology to improve data access and storage, while reducing costs

- More accurate, hassle-free documentation via Smart Notes

- Improve practice efficiencies and enhanced profitability

- Time and cost savings with easy implementation, updates, and use

QSIDental Web is enterprise-ready, which means it is built for the needs of large and growing practices—including your clinical necessities, advanced billing needs, practice management functionality, and reporting requirements.

Our experience and focus is and always has been on group practices, rather than single practices. We did not take a system developed for single practices and stretch it out for large practices—instead we designed our solution specifically for you.

With a 35-year track record of success helping dental practices increase productivity, reduce risk, minimize costs, and improve patient dental care, we've earned our trusted reputation. Let us help you succeed.

"QSIDental Web has brought us a level of streamlined communication between our practices that I don't think you could easily achieve locally."

Tonya Christal, *DDS*
Co-owner
Lee Dental Centers

Get ONE clinical charting and practice management solution for enhanced care and ROI

Achieve seamless integration between practice management and clinical tools using QSIDental Web. Get the charting, imaging, and clinical patient record data management you need to deliver complete and efficient care. Plus we've integrated this with the administrative record keeping and patient scheduling you need for maximum patient throughput and to maintain accurate, real-time patient data. As a result, you improve revenue while ensuring patient data integrity and enhancing your practice's reputation.

Having one, enterprise-ready, scalable solution helps your organization improve, and your business grow.

Use cloud technology to improve data access and storage, while reducing costs

Working in the cloud makes a work-life balance more achievable for you and your staff. QSIDental Web isn't only about flexible data access from the Internet or the platform's clinical and administrative functionality. It's about saving time and money.

Better cost, scalability, access

Cloud-based technology eliminates the up-front investment in dedicated computers and servers for your multi-office practice. Plus, your storage capacity, including digital imaging, is unlimited and scalable. Dentists and staff can manage clinical and administrative data in real time, all the time. And, every office site receives 100 percent functionality, speed, and versatility.
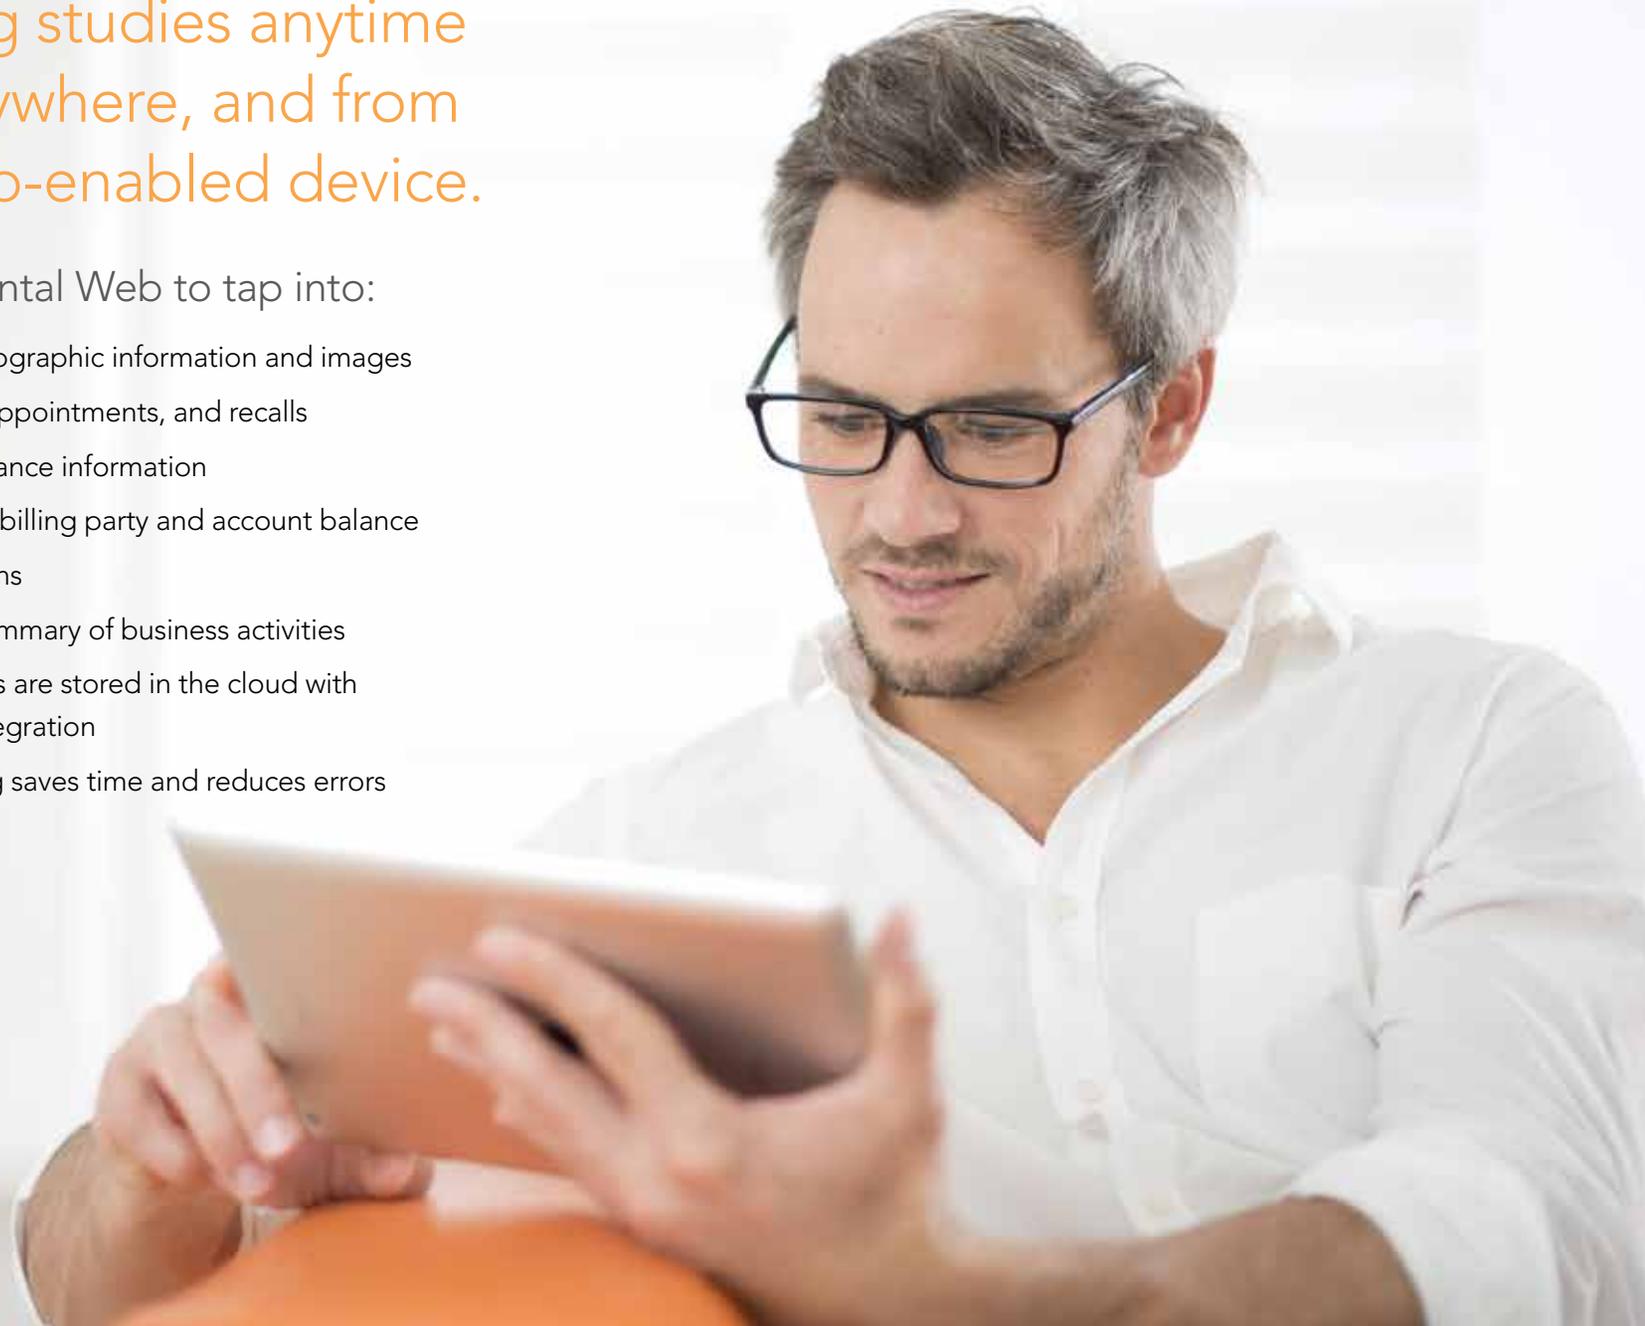

Safe, secure, compliant

The latest in online security technology ensures your data is safe and HIPAA compliant. Software and data are stored on secure remote servers for 24/7/365 access. Disaster recovery is easier using one secure, redundant, and seamless solution.

Finally, reduce or eliminate your up-front infrastructure costs.

Access patient data and imaging studies anytime and anywhere, and from any web-enabled device.

Use QSIDental Web to tap into:

- Patient demographic information and images
- Schedules, appointments, and recalls
- Patient insurance information
- Responsible billing party and account balance
- Payment plans
- Executive summary of business activities
- Patient x-rays are stored in the cloud with Apteryx® integration
- e-Prescribing saves time and reduces errors

Create more accurate, hassle-free documentation via Smart Notes

Streamline documentation and more accurately communicate information about your patients' health and care, using interactive Smart Notes from QSIDental Web. Rather than repeatedly composing a note, users need only select defined variables to create consistent, comprehensive notes. Easily enter clinical notes into a chart, often in advance.

A Smart Note has two basic components:

- Static text remains constant each time you create a note, providing both basic information and sentence structure
- Variable (replacement) fields are used to select from a pre-defined list of choices to complete specific clinical details

Including Smart Notes in patient charts provides information about treatment planning and procedures, or other significant patient data. Set them up to trigger after you enter a condition, procedure, planned service, or completion of a planned procedure – and automatically post them to a patient's chart history. You can also enter notes independent of a procedure.

It's documentation done right, faster, more easily.

Improve practice efficiencies

Enable your dental practices to operate more efficiently and effectively.

- **Task Scheduler** - The QSIDental Web Task Scheduler gives your practices the ability to establish and schedule processes to be performed automatically at a specific or regular interval. You can streamline many QSIDental Web activities into a single task request and schedule them for a specific frequency – similar to other calendaring and scheduling tools, with or without notification

- **Improved collaboration** - Using cloud technology, your specialists can easily communicate with your offices and each other for improved patient safety, accuracy, and convenience

- **Appointment confirmations** - leverage automatic appointment confirmations to avert lost revenue and quickly fill empty appointment slots

- **e-Prescribing** - easily, electronically handle prescriptions and refill requests

- **Online patient education** - help improve patient satisfaction and outcomes with our simple, effective, web-based patient education

"The practice operating cycle—from the new patient calling, to check-in to checkout—has all speeded up. The way that the program works is intuitive. Scheduling patients is a lot faster. Having more information at your fingertips and not having to navigate from tab to tab to tab is great."

Maria Fuertes, *Director of Operations*
Riverside Dental Group

Enhance profitability and ROI

See a better bottom line through more intelligent billing processes.

- Reduce lost and missed revenue; QSIDental Web automatically posts completed treatments to be billed

- Save time and eliminate faxing using our Fast Attach feature. Using NextGen® Electronic Data Interchange (NextGen EDI) services, scan insurance claims (such as 835s), and add them to your system automatically for improved accuracy, reliability, and time savings

- Easily access your EDI claims history and user messages

- Collect revenue faster and reduce errors by digitizing your files and claims. You'll require fewer manual labor hours and resources when you scan and index EOBs in batches

Save time, reduce costs, and ease use

With no big infrastructure required, our system is easy to start up. Updates and backups are automatic, taking administrative stress off your team. Finally, because the system is easy to use and intuitively designed, it's easy for your team to get up to speed. However, if you want advice or help with training, QSIDental Web experts are always available.

- Easy start-up, go live
- Automatic updates, backups
- Easy to use, maintain

QSIDental Web – hard not to say yes!

Why wait to start improving care and ROI? Our single, integrated clinical charting and practice management solution is proven to help.

- Cloud technology improves data access and storage, reduces costs

- Produce more accurate, hassle-free documentation via Smart Notes, while enhancing practice efficiencies and profitability

- Get fast easy implementation, automated updates, and ease of use

Other rewards of saying "yes!" to QSIDental Web include adding the expertise of our staff to your team, proven performance, and better practice results. You'll be confident knowing that you're doing everything possible for superior patient care while driving better financial results.
