Don’t have the time, staff, or money to build or manage your own network in house? Don’t worry. NextGen Healthcare has got you covered. With our state-of-the-art, cloud-based hosting services, you control your access, data, and costs. Learn how inside.
Data at your fingertips, whenever, wherever.

With cloud-based technology, healthcare providers can now connect, collaborate, and manage their practice and patient data on a higher level than ever before. Our cloud-based hosting solution is designed for those practices and organizations seeking healthcare information technology (HIT) automation without the expensive and time-consuming burden of maintaining in-house hardware and networking systems.

Why NextGen Healthcare?

The short answer…NextGen Healthcare is a proven expert in health information technology (HIT). We provide integrated solutions, including electronic health records (EHR), practice management (PM), revenue cycle management (RCM), and consulting services to healthcare organizations nationwide. We understand the technology and we understand how you work. With NextGen Healthcare as your technology partner, you have cloud-based access to a complete integrated EHR/PM solution to help your practice thrive, without the hassle of maintaining technology.

- Eliminate capital expenditures
- Simplify implementation
- Reduce total cost of ownership

Combine our robust NextGen® Ambulatory EHR solution with a state-of-the-art, cloud-based infrastructure and you have a solution that can be tailored specifically to match the needs of practices of all sizes across all specialties.

Operate NextGen Ambulatory EHR without purchasing and maintaining servers at your location. Applications are “hosted” on a remote server at multiple locations.
Maximum convenience, minimum cost.

NextGen Healthcare cloud-based hosting offers convenience, affordability, and 24/7 monitoring and support by expert technicians, combined with an advanced hardware and networking infrastructure. As a result, any practice, regardless of size, can enjoy the benefits of a cloud-based environment for its EHR and practice management systems.

Proven Benefits

- Low upfront investment and predictable annualized costs
- Reduced learning curve
- Faster initial installation and set-up
- Improved performance and on-demand scalability for applications
- World-class support provided by NextGen Healthcare in partnership with Dell
- HIPAA compliance with electronic data security
- 24/7 monitoring and support by expert technicians
- Redundant systems, power, connectivity, and cooling
- Elimination of time-consuming server upgrades and backups
- Superior reliability in devices configured for integration
- Competitive pricing and financing options available

A truly cost-effective alternative.

- Eliminate capital expenditures – Get competitive pricing with a monthly subscription fee for NextGen Healthcare software and cloud-based hosting; enterprise pricing is also available, depending on the size of the practice
- Enjoy a robust fixed-cost solution – Includes state-of-the-art, cloud-based implementation, training, maintenance, image scanning, and superior client support
- Collaborate with interoperability – Physicians, pharmacies, labs, and patients all connected securely in the cloud to expedite care, reduce mistakes, and improve patient outcomes
- Be more secure – All activity performed on our network is backed up daily; this includes 24/7 monitoring and a complete disaster recovery solution
- Experience high reliability – Our expert technicians continuously manage our EHR servers; performing backups, installing updates and upgrades, and managing system security
Cloud hosting is gaining momentum as a preferred platform for practices of all sizes, with one industry poll showing approximately 30 percent of users opting for the cloud.¹ Projections are that cloud-based solutions will enjoy significant growth and adoption by healthcare organizations during the next five years. With reduced costs, on-demand availability, elimination of time-consuming software implementations and upgrades, and reductions in information technology staff and infrastructure, cloud-based solutions provide compelling business reasons for adoption.

Secure data, protected practice.

Connect to the Cloud.

Cloud-based hosting services from NextGen Healthcare are among the most secure and reliable in the nation today. For more information about the benefits of NextGen Healthcare cloud-based hosting for your practice or organization, please contact us at AskHW@nextgen.com.
